

In **1999** the state power company Energex in Queensland submitted an application to place two substations across the road from where Donna and her family lived. After placing a letter concerned it was hazardous for the people and Logan City Council agreeing, Energex threw Donna into a 10-day court case in 2001 where in the capacity of QC she represented the people. After battling bureaucracy and red-tape and a politician telling her to “*Get back in the kitchen*” Donna created a WORLD-FIRST for the people. On the final day of the court case, the QC for Energex, Peter Lyons asked Donna “Do you think the people of Australia will ever realise what you have done for them?” Since then Donna has been assisting women in workplace breast cancer clusters and educating therapists and doctors – MINDD FORUM 2016 and BIOBALANCE Conference 2016 - and the public on the serious public health issue of EMF. Donna also lectured on dirty electricity (radiowaves running along all electrical wiring) on behalf of the world’s top power quality expert Mr Dave Stetzer in Chicago, USA.

In **2014** Donna was advised by a severe EHS sufferer that after spending thousands of dollars she tried Blushield and it turned her life around. Blushield is designed in New Zealand and Donna - who also still advocates strongly to lessen exposure - is now the Australasian importer for Blushield as we have passed the point of just being able to lessen exposure from EMF. Blushield is a MINDD partner and the product approved and recommended by their board. Donna believes Blushield is the most effective EMF protection product available today/ If another product is made available that is superior Donna will let everyone know.

Donna is part of the Australasian contingent of the EMF PROTECTION PROJECT. In August 2018, Donna finally had an appointment with a Senator’s office to get support from politicians for an on-going public EMF Awareness Campaign, a disability pension for EHS sufferers and a White Zone to be established. Physicist Victor Leach, Dr Russell Cooper (with valuable new testing criteria for EHS) and Barrister Raymond Broomhall of Justice Michael Kirby Chambers legal firm are now also active on this issue as are many other EMF experts and private citizens.

Erin Brockovich exposed toxic water in a small town, Dr Jeffrey Wigand exposed toxic cigarettes – not everyone smokes. Donna Fisher exposed toxic EMF which is everywhere – WE are ALL affected.

Donna is the author of 4 books on EMF: *Silent Fields: The Growing Cancer Cluster Story* (2008); *More Silent Fields: Cancer and the Dirty Electricity Plague* (2009); *Dirty Electricity and Electromagnetic Radiation: Understanding Electromagnetic Radiation* (2011) and *Light that Heals: Energy Medicine Today & Beyond* (2014)

Blushield technology is the most advanced EMF protection I have found to date. I don’t make this bold claim lightly – I’ve researched, tested and assessed the efficacy of countless technologies. And I have done this before with other technologies and devices. Blushield, however, is ‘personal protective equipment’ that operates as close as we can get to minimising the adverse effects of harmful EMFs. Jason Bawden-Smith *In The Dark: New Ways To Avoid The Harmful Effects of Living In A Technologically Connected World*. Jason, an Environmental Scientist, sourced and introduced technology into Australia that has reduced lead poisoning in Australia’s children and reduced the impact of excessive exploration and mining activities on the planet.
