Active EMF Protection
Home, Workplace, Out & About
Intelligent Technology

“It appears that the body is responding to the Blushield allowing the body to ignore more stressful environmental frequencies emitted from electrical devices, including mobile phones.”

You Can't Hide From EMF

Blushield Tesla Gold Series

Active EMF Protection
Home, Workplace, Out & About

Intelligent Technology

*Putting **Wi-Fi** in schools; allowing **cordless phones** that radiate constantly to be manufactured; placing **wireless baby monitors** near an infant; using a **wireless tablet, smart phone** or **computer** while pregnant; holding a **cell phone** next to the head and keeping a cell phone in a bra or hip pocket or under a pillow; placing **cell phone antennas** near homes, schools and on hospitals; metering electricity, water and gas with **wireless smart meters** and designing **smart appliances** for the home will be viewed by future generations as **dumb technology** generated by **greed** for a population that is largely ignorant of the consequences. We need to protect the health and wellbeing of future generations, because without them there is no future! If we don't do it... who will?*

Associate Professor Dr Magda Havas, PhD, Environmental and Resource Studies, Trent University, Canada

The human-made electromagnetic fields (EMF) from all things electrical, electronic and wireless are so much stronger than Nature's and our own natural subtle fields. It is essential to use 'active' EMF protection, and this is why Blushield is powered with microprocessor technology. 'Passive' protection does not have the strength.

When you plug in a Blushield or switch on one of the portable products, millions of frequencies within the human responsive range are emitted for a few seconds every 30 seconds to keep you in a coherent field which the body responds to. This is called 'sympathetic resonance'. Your body would much rather respond to natural frequencies than the signals emitted from EMF devices such as wi-fi, mobile phones and antenna towers, smart meters and the many other EMF sources that now surround us virtually all day and all night every day.

Scientists world-wide are calling for 'white zones' - no or extremely low EMF environments - to be established around the world. However, this can mean living with no or very limited electricity or wireless devices, unthinkable to those who enjoy the convenience and advantages of modern-day technologies. With Blushield revolutionary scalar wave technology you are still able to use these technologies with no interference.

Just as EMF can affect every cell at once, with adequate protection, Blushield can protect every cell at once utilising crystal photonics to generate scalar fields, resulting in advanced and effective EMF protection. Blushield 'active' technology restores the environment, safely reducing the EMF radiation absorbed, to enable the body to reach coherent balance.

'Scalar energy', also referred to as 'scalar waves' and 'Tesla waves' has existed since the beginning. All fields in Nature are scalar fields. The Universe's matter is organised by information and all living organisms have evolved in this coherent life-promoting energy field that carries the information to sustain and enhance life, a bio-resonant process of orchestrated orderliness that entrains the mind and body to function. It is critical to life and our well-being that the relationship between this life-sustaining energy and us remains intact.

The brain broadcasts the perceptions of the day to every one of the body's trillions of cells so it is critical that our natural electrical and electromagnetic signals are not overridden, enabling altered instructions to govern. Electrical rhythms which govern all body processes in our brain, can be influenced by external human-made signals with information that can swamp natural electromagnetic cues and result in dysregulation and de-synchronisation of normal biological rhythms that direct growth, development, metabolism and repair mechanisms to maintain health.

Bruce Lipton PhD states cellular technology created us, and in designing the human body, cellular communities developed amazing technologies that were needed to manipulate, regulate and precisely control their environment. Our overall health is determined by the health of every individual cell - tissues and organs can become comprised if our cells function poorly. Our cells are cooperative and coherent systems, as is scalar energy.

The genius Nikola Tesla released scalar waves in 1899 and the brilliant renowned physicist Albert Einstein documented how these waves could be practically applied. Today, scalar waves are already being used in communications and medical applications. Eventually, scalar wave technologies that do not harm will become a part of our way of living, replacing the radio waves and microwaves now currently in use.

**Nature, Humans and Blushield
would only work with the best technology**

Rather than being victims of our genes, epigenetic science reveals, that by controlling our environment, we have the power to control our biology and become masters of our fate... we are also destined to use technology to ensure our survival. Bruce Lipton PhD, *Spontaneous Evolution: Our Positive Future (And A Way to Get There from Here)*

HOME & WORKPLACE

TESLA Gold Plug-In

With a 45 metre radius in all directions (90 metre diameter), this model is recommended for homes with low to medium EMF levels. Place in the wall socket and turn on the socket switch. The Cube is recommended if you have 5 or more wi-fi signals.

TESLA Gold Cube

With a 90 metre radius in all directions (180 metre diameter), this model is recommended for homes with high EMF, homes within a kilometre diameter or in line of sight of a mobile phone antenna tower, homes with smart meters, high-rise apartments, workplaces, schools and hospitals. Place the cord in the socket and turn on the socket switch.

TESLA Gold Ultra

With a 90 metre radius in all directions (180 metre diameter) and at least two times stronger than the Cube, this model is recommended for ultra-high microwave radiation EMF environments which may include: within 250 metres of a mobile phone antenna tower, close to a smart meter grid, factories and some hospital situations.

OUT & ABOUT

TESLA Gold Portable

One of two rechargeable portable models, the Portable has a three metre radius (six metre diameter) area in all directions. Place this business card size model in your pocket when out & about when away from the stronger field of the Plug-in/Cube in your home and workplace. If left ON all the time, charge can last up to 7 days.

TESLA Gold Disc

One of two rechargeable portable models, the Disc has a three metre radius (six metre diameter) area in all directions. Place on your arm when out & about or separate the disc for use as a pendant when away from the stronger field of the Plug-in/Cube in your home or workplace. Does not have an ON/OFF switch. Charge can last up to 5 days.

IN YOUR CAR

TESLA Gold Auto

With a 15 metre radius in all directions (30 metre diameter) and half the strength of the Cube, the Auto is recommended for vehicles, especially while using mobile phones and other wireless technologies when travelling in a car/truck/bus.
