

SCALAR ENERGY General Information

Following on from the famous mathematician, astronomer and one of the greatest scientists of all time, Pierre-Simon Laplace (1749–1827), physicist James Clerk Maxwell (1831–1879) furthered the understanding of 'scalar energy' laying the foundation for quantum physics. Instrumental in the generation of electricity which commenced in 1895, Nikola Tesla (1856-1943), in his laboratory in 1899, accidentally released scalar energy, naming it 'radiant energy'. Tesla continued to experiment with this energy for therapeutic purposes until his death. In his honour, today this energy, mostly referred to as a 'scalar wave', is also known as a 'Tesla wave'. It is also referred to as zero point energy and a torsion field. Tesla warned of the dangers of X-ray radiation and learned how to harness scalar energy from one transmitter to another without using any wires as he planned to utilize scalar energy as the preferred carrier wave for all telecommunications, unlike the radiowaves and microwaves in use today. Physicist Albert Einstein (1879–1955), a contemporary of Nikola Tesla, documented how scalar energy could be practically applied.

Following on from his discovery of the potential vortex in 1990, German physicist Professor Konstantin Meyl, detected that our whole body works with scalar waves, that the DNA transports information and energy with a magnetic scalar wave, that the nerves transport scalar waves, that the nodes Ranvier detected indicate a standing, longitudinal wave – scalar wave – and that bio-resonance medicine and homeopathy use scalar waves. Meyl explains how the DNA is sending information and energy as an antenna using a scalar wave – Tesla Scalar Waves and the Unified Field Theory . Magnetic scalar wave theory explains how the dual base pair-stored information of the genetic code is formed. Information transferred at the receiving end during the reverse process takes place involving a change in the physical and chemical cellular structure. The energy required to power the chemical process, is now understood by the extended field theory to come from the magnetic scalar wave. Magnetic scalar wave theory best explains the physical basis of life. The process of converting electrical modulation into 'piggyback' information that transfers or is sent from the cell nucleus to another cell is a revolutionary theory.

Originating from mathematics and utilized in communication systems, scalar energy is now also used to enhance the body's innate ability to repair itself. Cells and tissues are highly non-linear, co-operative and coherent systems and scalar energy is non-linear, co-operative and coherent. Meyl states in the presence of scalar waves, cells go into resonance. Professor James Oschman states scalar energy appears to: interact with atomic nuclei rather than with electrons and be intimately involved in healing. In contrast to the electromagnetic wave, a scalar wave transports energy in addition to the information. Antoine Priore (1912–1983) utilized a powerful and accurate scalar energy instrument that effectively reprogrammed the mutated DNA in both humans and animals alike, and subsequently cured all types of cancer. Thomas Galen Hieronymus (1895-1988) observed that each organ or tissue in the human body possessed a unique scalar energy harmonic and that the level of vitality of an organ or tissue could likewise be ascertained by way of scalar energy analysis.

As described in their book published in 2008, *Decoding the Human Body-Field*, Peter Fraser and Harry Massey believe quantum scalar fields, which are fields of information, interact to form a complex system that drives chemistry and influences the deepest mechanisms of biology. In fact, their decades of research suggest that the bioenergetic systems in the human body form a master information control system for the physiology of the body, directing its biochemistry and physiology. They refer to this as the human body-field.

Harnessing this life-affirming energy that has been with us since the beginning, scalar wave chambers today emanate therapeutic scalar waves with the potential to re-charge our cells and raise the energy level of every cell in the body to optimum levels. Scalar wave energy is clinically proven to enhance: clarity, meditation, rejuvenation, anti-aging, general health and well-being. Scalar wave chambers have also been shown to: allow cell regeneration, positively influence immune and nervous systems, elevate moods, decrease the effects of stress on the body and increase energy levels.
