HOME & WORKPLACE

TESLA Gold Plug-In

The Plug-in model has a 45 metre radius area in all directions (90 metre diameter). This model is recommended for homes with low to medium EMF levels. For the Blushield field to be equal or stronger than the EMF field, the strength of the device is more important than the radius covered. The Cube is recommended for most homes in Australia.

D 90mm x 30mm x 40mm, W 75g.

TESLA Gold Cube

The Cube with a 90 metre radius in all directions (180metre diameter), is roughly twice the strength of the Plug-in. The Cube is recommended for homes with high EMF, homes within line-of-sight of a mobile phone antenna tower, homes with smart meters, solar panels, high-rise apartments, workplaces, schools and hospitals.

D 100mm x 100mm x 110mm, W 250g.

TESLA Gold Ultra

The Ultra has a 90 metre radius in all directions (180 metre diameter) and is twice the strength of the Cube. The Ultra is recommended for homes in ultra-high EMF home environments which may be in close proximity to a mobile phone antenna tower or close to a smart meter grid. Also recommended for many workplaces, factories and hospitals.

D 140mm x 40mm x 100mm, W 360g.

OUT & ABOUT

TESLA Gold Portable

The new white ABS Portable has a three-metre radius (six metre diameter) area in all directions. Place in your pocket or bag when out & about when away from your protected zone, or when travelling.

D 80mm x 50mm x 8mm, W 30g.

TESLA Gold Portable

- Wireless Charge

The new black ABS Portable is twice the strength of the white Portable. With a three-metre radius (six metre diameter) area in all directions, place in your pocket or bag when out & about when away from your protected zone or when travelling.

D 100mm x 60mm x 10mm, W 50g.

IN YOUR CAR

TESLA Gold Auto

This Auto model with a 15 metre radius in all directions (30 metre diameter) is half the strength of the Cube. The Auto is recommended for all vehicles, especially while using mobile phones and other wireless technologies when travelling. Travelling in a car with a mobile device can amplify the EMF up to three times stronger than in free space.

D 60mm x 80mm x 30mm, W 100g.
